

ML2021Spring HW11 Report

<BME> <LI-WEI YANG>

<b07611001>

Public Score	Private Score
0.80712	0.81010

The methods I used to pass the boss baselines include:

1. Use the method in <https://arxiv.org/abs/1505.07818> to adaptively control the domain adaptation parameter λ (λ_p)

$$\lambda_p = \frac{2}{1 + \exp(-\gamma \cdot p)} - 1$$

where γ was set to 10, p stands for the progress of training, from 0 to 1

2. Train for longer time (3200 epochs)
