

ML2021Spring HW6 Report

<BME> <LI-WEI YANG>

<b07611001>

Public Score	Private Score
AFD: 0.720 FID: 8,181.91	X

The methods I used to pass the boss baselines include:

1. Change the model structure to SWAGAN in
<https://github.com/rosinality/stylegan2-pytorch>
2. When generating images, adjust truncating ratio to 0.6
3. use data augmentation technique:
RandomHorizontalFlip(p=0.5)
ColorJitter
(brightness=(0.8,1.05), contrast=(1, 1.2), saturation=(1, 1.2), hue=(-0.05, 0.05))
